

TVS-10

Portable Inspection Camera

Underground Inspection Quick - Affordable - Safe - Reliable

TVS-10 is designed for the fast inspection and diagnosis of industrial tanks, vessels and pipes. The lightweight unit with its carbon fiber telescopic pole and sprung loaded stabilizing pole allows for easy single user operation. Ideal for pipe diameters from 100mm (4") to 1500mm (60"). The hi-vis vest houses the control box, MP5, with 4.3" screen and battery pack. The easy to operate camera with its HID lights guarantee a perfect view every time.
